ELECTRIC STATION

INTRODUCTION

Description of the problem

After the invention of electric cars, we faced several challenges, the most important of which is the process of charging the car

Solve the problem :-

Providing electric charging stations in all regions of Saudi Arabia

PROJECT IDEA

- In the electric station application, you can register your home as an electric station or electricity station company owners by displaying it in the application. And use it as extra income If the battery is about to run out, the person who owns the electric car can search the power station application and search for the nearest person who provides the service
